Graphic Design

M. Habib Al Hudry

## Hello, I'm Habib

I am a Computer Science graduate with a strong interest in graphic design, UI/UX, and basic animation. I am proficient in using Photoshop, Illustrator, Figma, and CorelDraw, and have explored motion and 3D design through After Effects, Premiere Pro, Blender, and CLO3D. I have experience in creating visually appealing designs and interfaces, supported by active involvement in organizations and achievements such as ranking 5th in the UI/UX Design competition at INDONERIS 2023. Combining creativity and technical skills, I am ready to bring fresh ideas and collaborate in a dynamic team to create impactful design solutions.

## Education

### Informatics

Amikom Purwokerto University | 2021 – 2025

GPA 3.82/4.00

## Software Tools

# HMPS Informatika

## Organization

HMPS Informatika is an organization of informatics students. In this organization, one of my tasks is to design Instagram. I chose a theme and style with a feel of *futuristic minimalism*, combining simple and innovative modern elements to reflect the technological identity of the informatics department.

## Social Media Design

# Visual Design Explorations

7 Personal & Commission Project

A collection of personal works exploring visual storytelling through promotional poster design, sports graphics, and digital manipulation. Each project blends photography, dynamic composition, and bold graphic elements to express energy, movement, and modern aesthetics.

Poster Design

Sports Graphic

Digital Imaging

Ps

Vietnamese-style Advertising Poster

This project is a personal exploration in poster design inspired by Vietnamese advertising style, characterized by bright visuals, strong contrasts, and an optimistic atmosphere. This poster promotes GoTo services, highlighting energy, enthusiasm, and positivity—elements commonly found in Vietnamese street advertising and billboards

Movie Poster (Parody)

This project is a my personal project focused on creating a parody poster design for the film 'Tinggal Meninggal'.

The creative process involved digital imaging techniques and image manipulation, resulting in a visual composition that resembles the original film poster but with the distinctive comedic touch characteristic of parody style.

**Thank You**
