3D Animation

M. Habib Al Hudry

Hello, I'm Habib

I am a Computer Science graduate with a strong interest in graphic design, UI/UX, and basic animation. I am proficient in using Photoshop, Illustrator, Figma, and CorelDraw, and have explored motion and 3D design through After Effects, Premiere Pro, Blender, and CLO3D. I have experience in creating visually appealing designs and interfaces, supported by active involvement in organizations and achievements such as ranking 5th in the UI/UX Design competition at INDONERIS 2023. Combining creativity and technical skills, I am ready to bring fresh ideas and collaborate in a dynamic team to create impactful design solutions.

HMPS Informatika

Organization

HMPS Informatika is an organization of informatics students. In this organization, one of my tasks is to design Instagram. I chose a theme and style with a feel of *futuristic minimalism*, combining simple and innovative modern elements to reflect the technological identity of the informatics department.

Social Media Design

BEM Kabinet Integritas

Organization

Kabinet Integritas is the management of BEM for the 2021–2022 period. In this management, one of my tasks is to design Instagram posts with the theme “Darkness of Indonesia in September”. This theme illustrates some of the dark events that occurred in September which until now have not been resolved by the state fairly and prioritize the principles of human rights.

Social Media Design

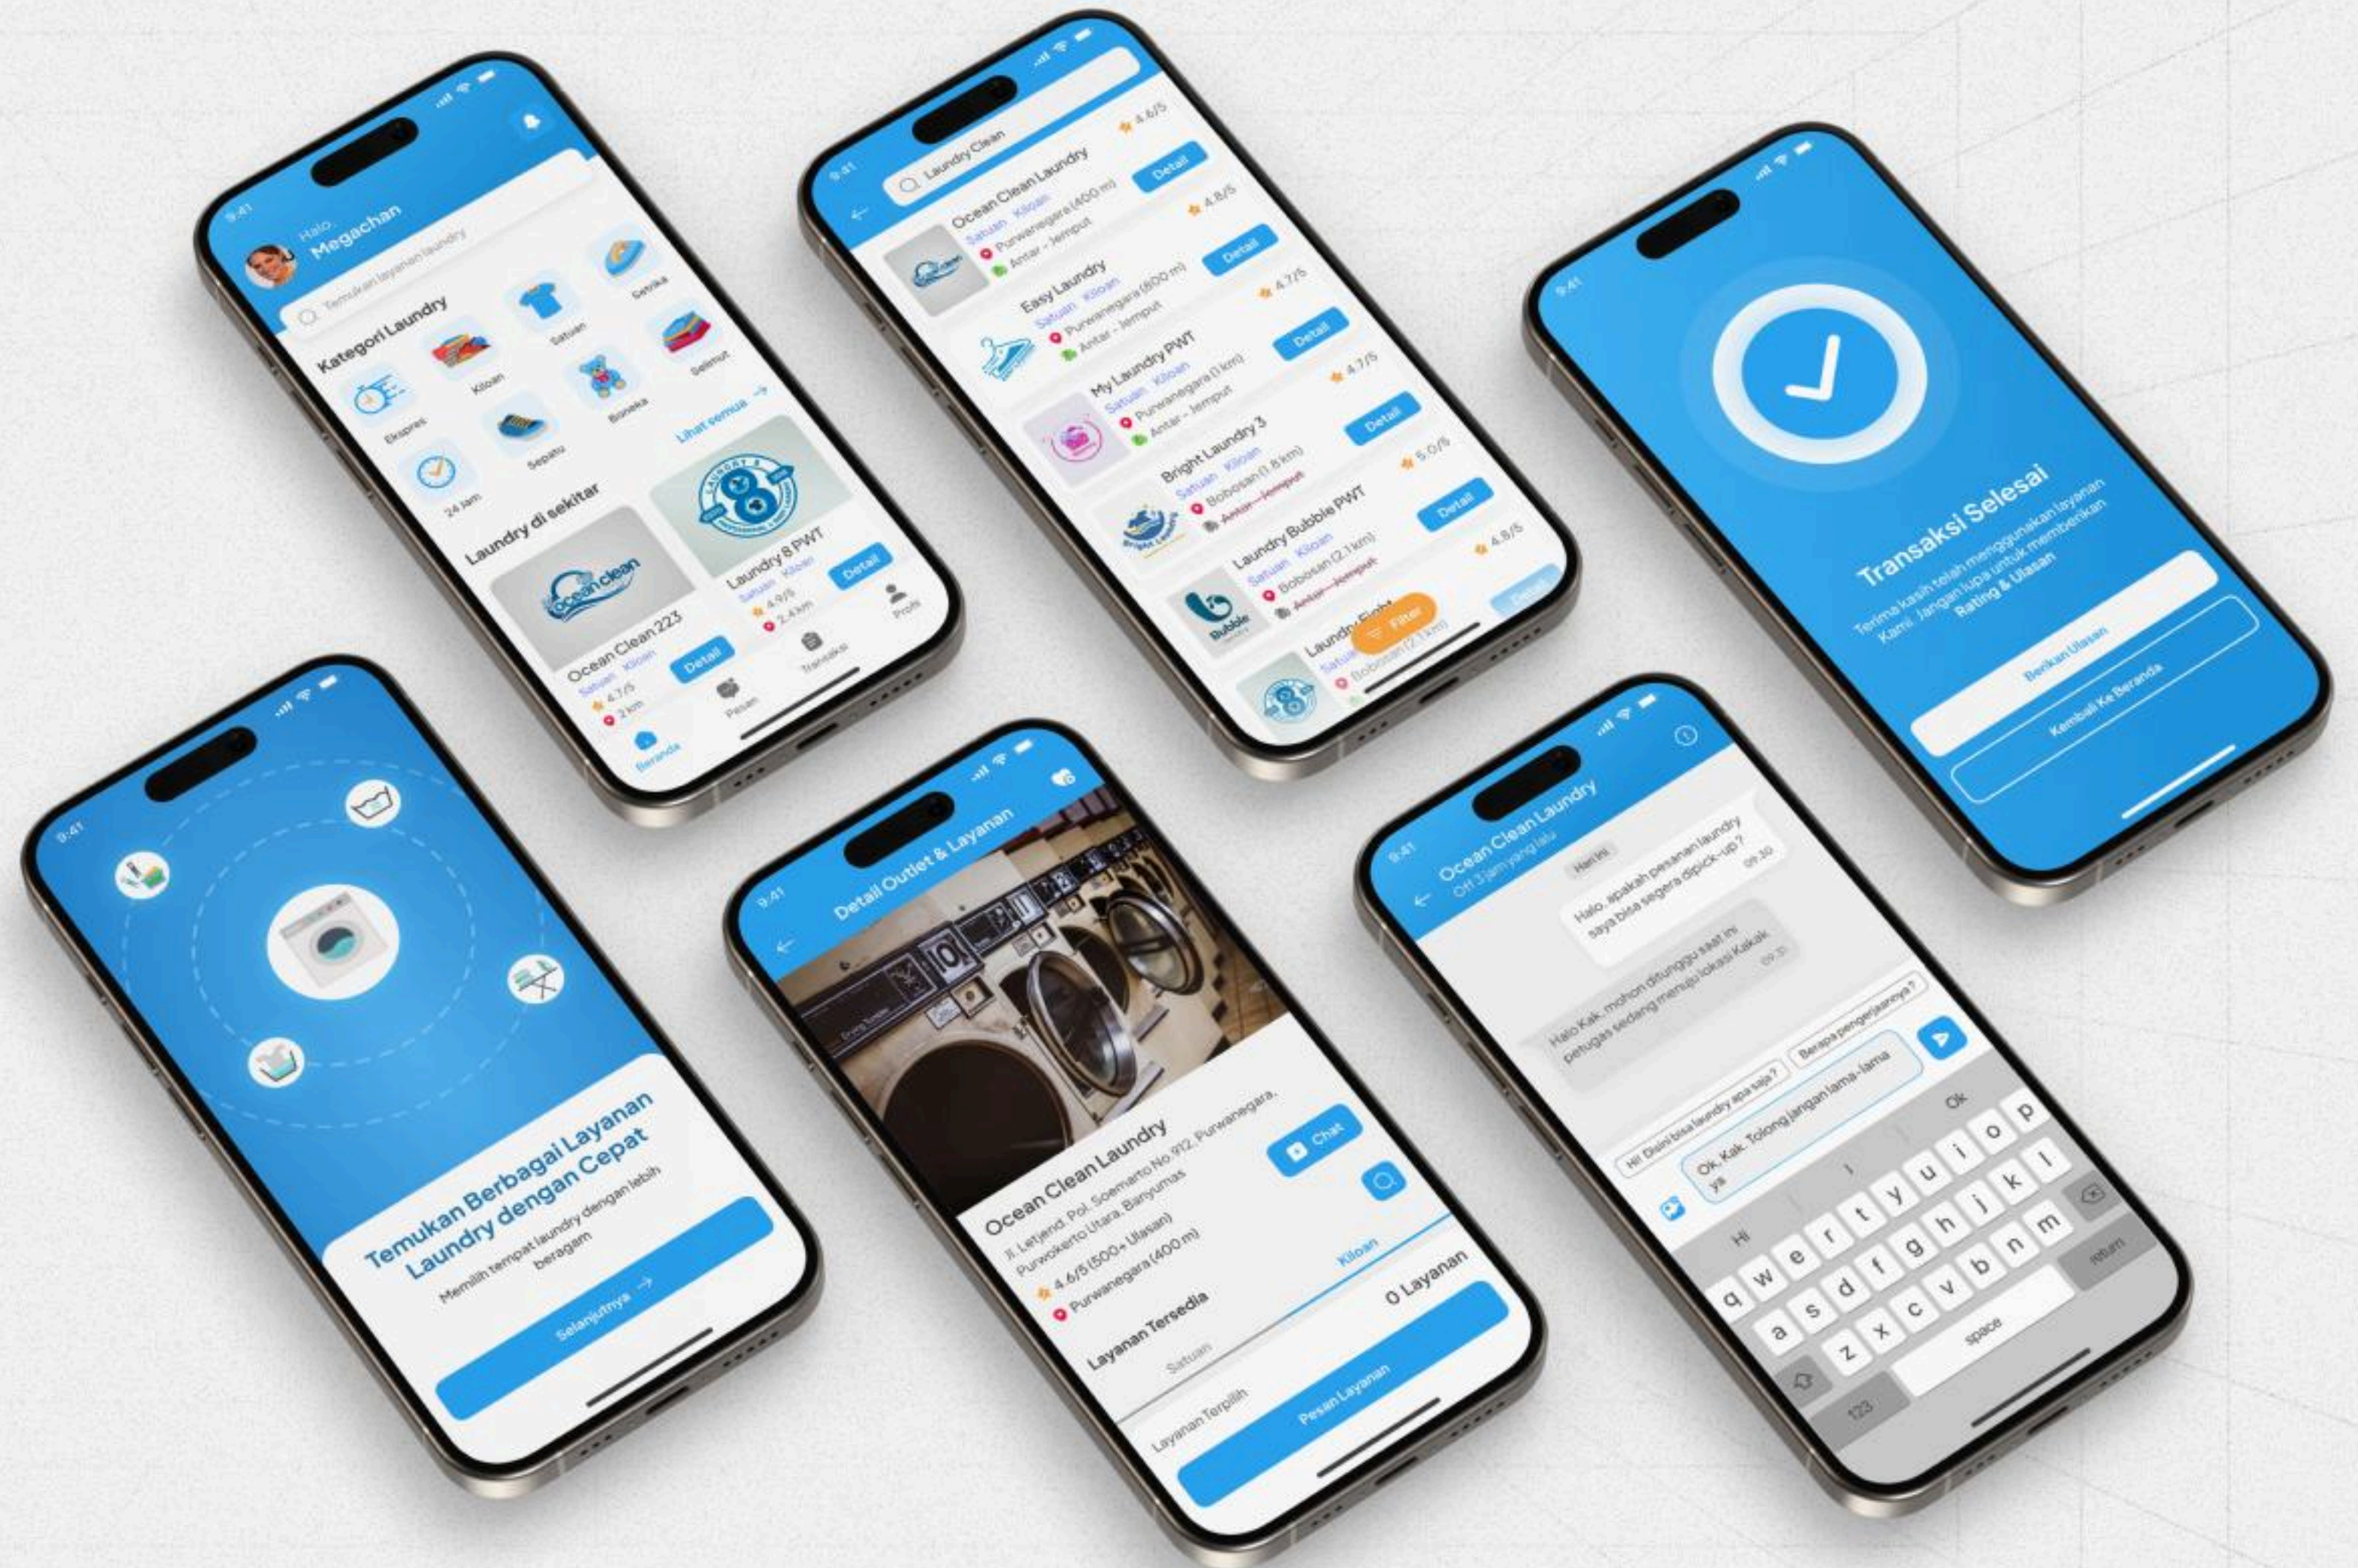

AnyWash Laundry App

➤ Course Projects

AnyWash is a laundry service application designed by my team for the UI/UX Design Competition at the Indoneris 2023 National IT event. The design of this application was motivated by the user's need to get laundry services that are easy, fast, and guarantee service quality in an application. This application was designed by implementing the design thinking method.

3D Animation Jersey of Esport Arena

➤ Course Projects

This project featured a 3D visualization for the Arena E-Sport Community vol. 5 jersey design, which was yet to be physically produced. By utilizing CLO3D for modeling and Blender for animation and rendering, the jersey design was visualized in detail with a realistic and high-quality appearance. In addition to highlighting design details, this visualization is enriched with cinematic camera movements to give a professional impression.

Visual Design Explorations

7 Personal & Commission Project

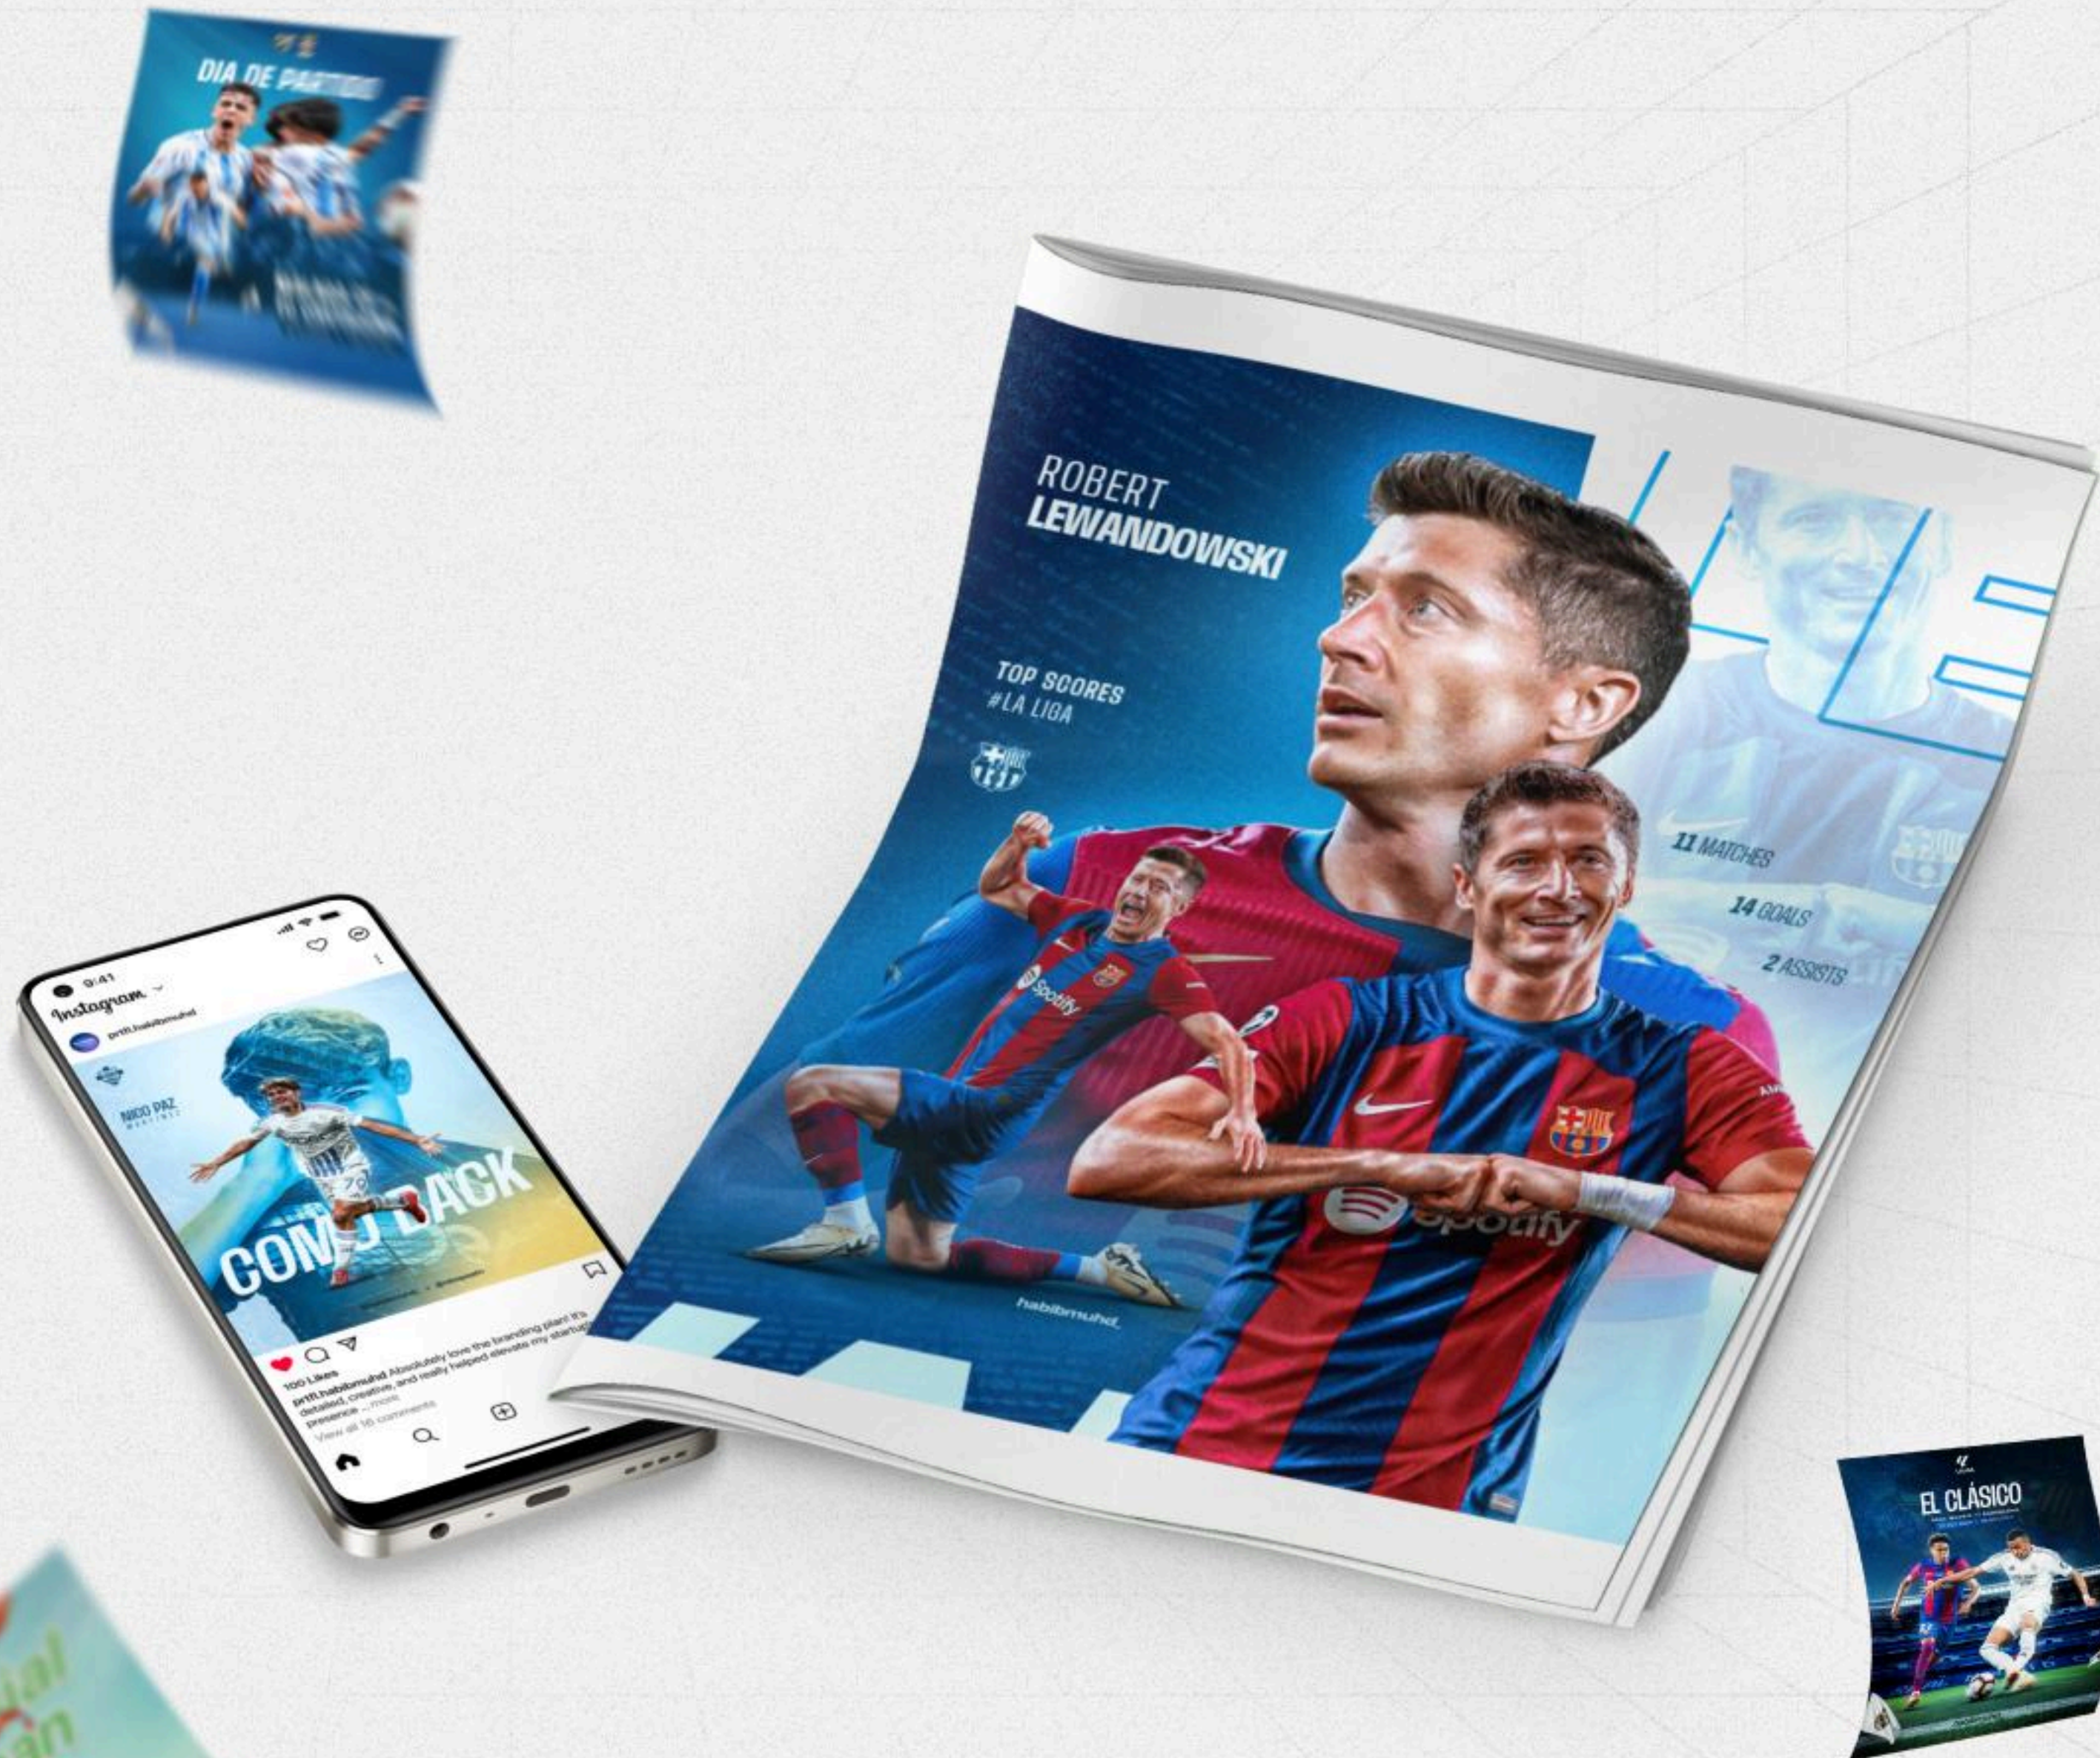

A collection of personal works exploring visual storytelling through promotional poster design, sports graphics, and digital manipulation. Each project blends photography, dynamic composition, and bold graphic elements to express energy, movement, and modern aesthetics.

Poster Design

Sports Graphic

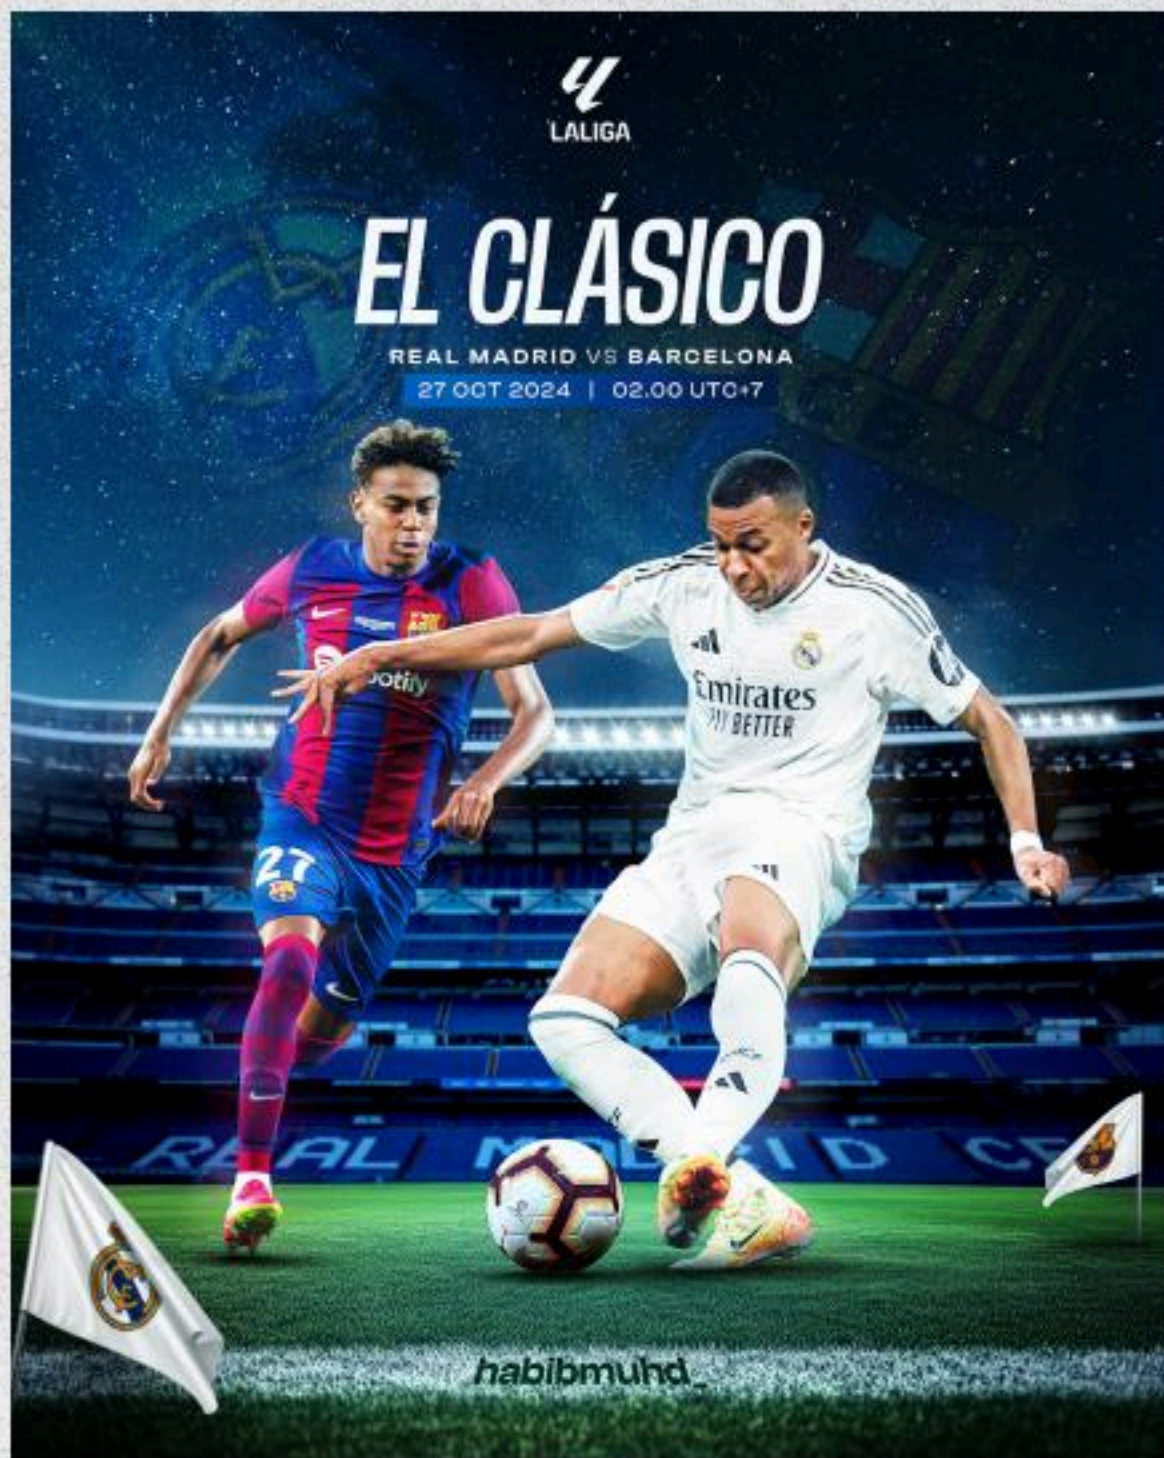

Digital Imaging

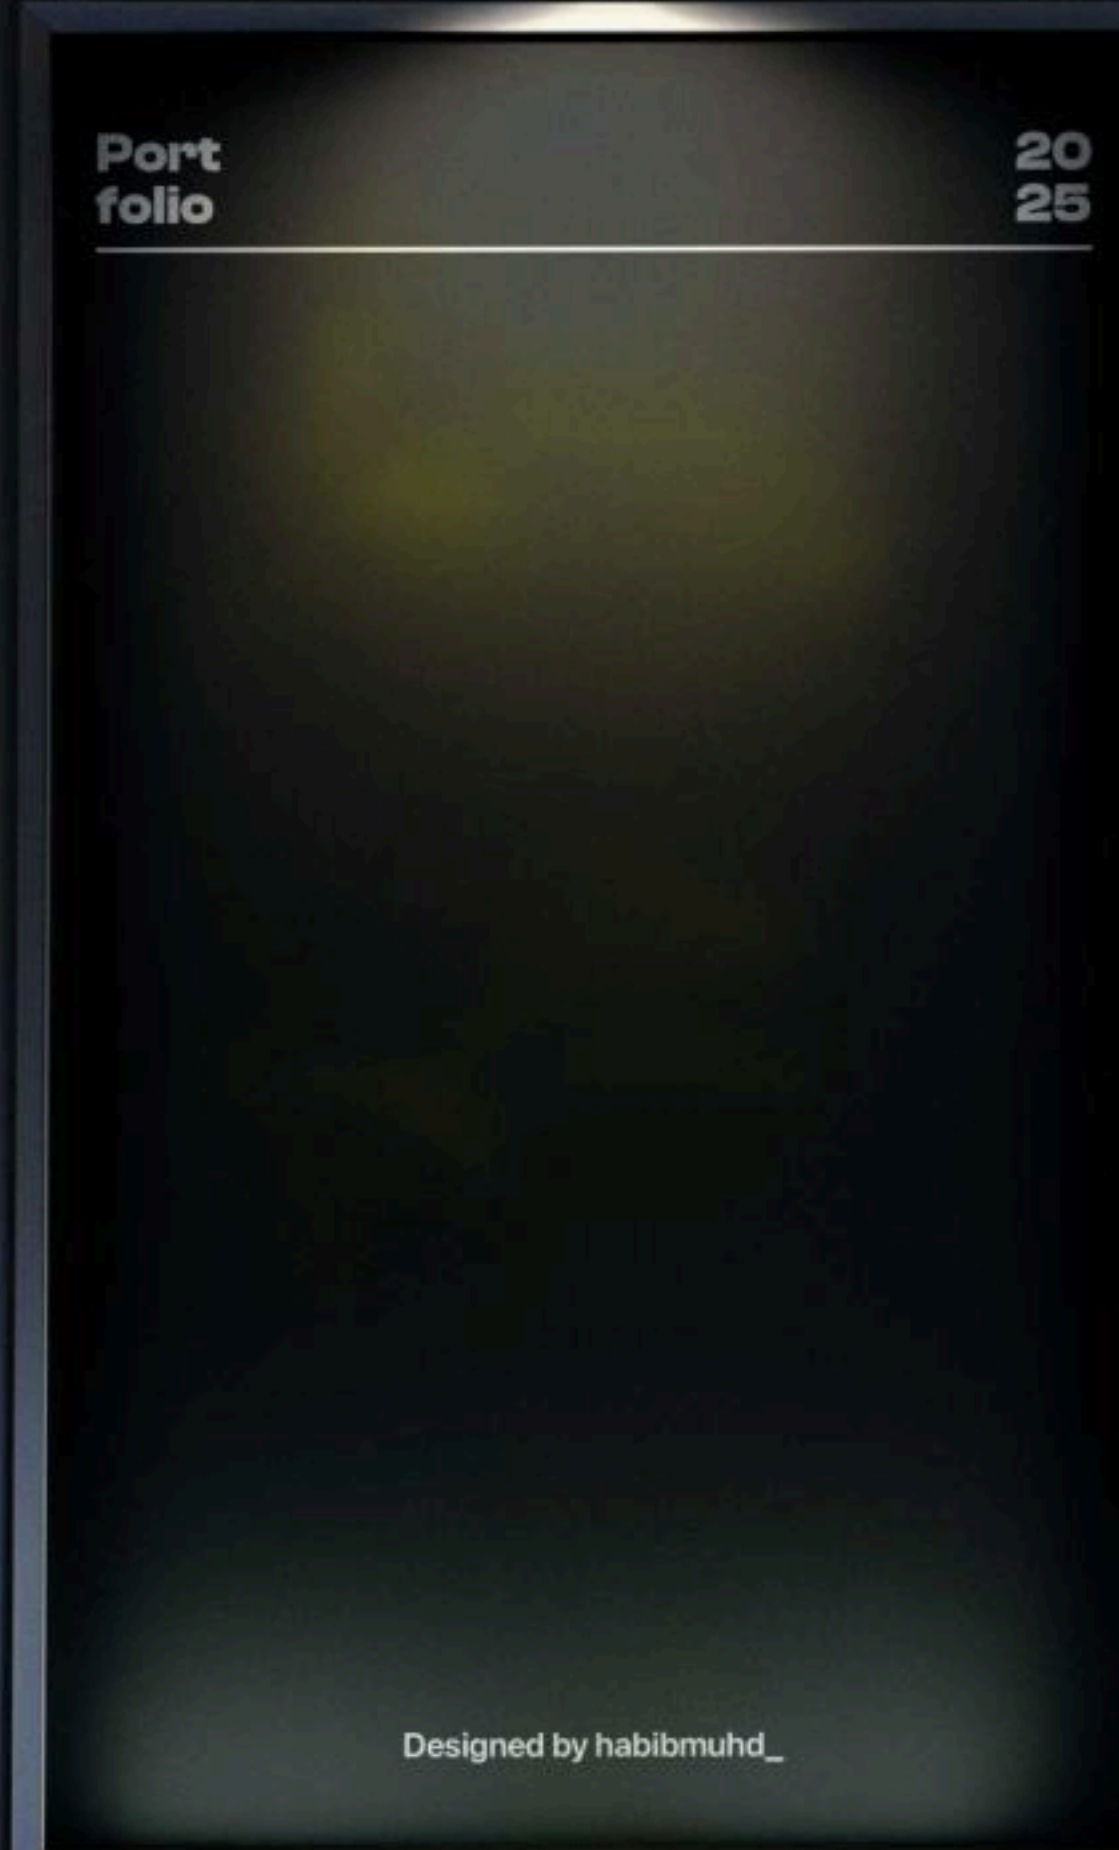

Ps

Sport Graphic Poster

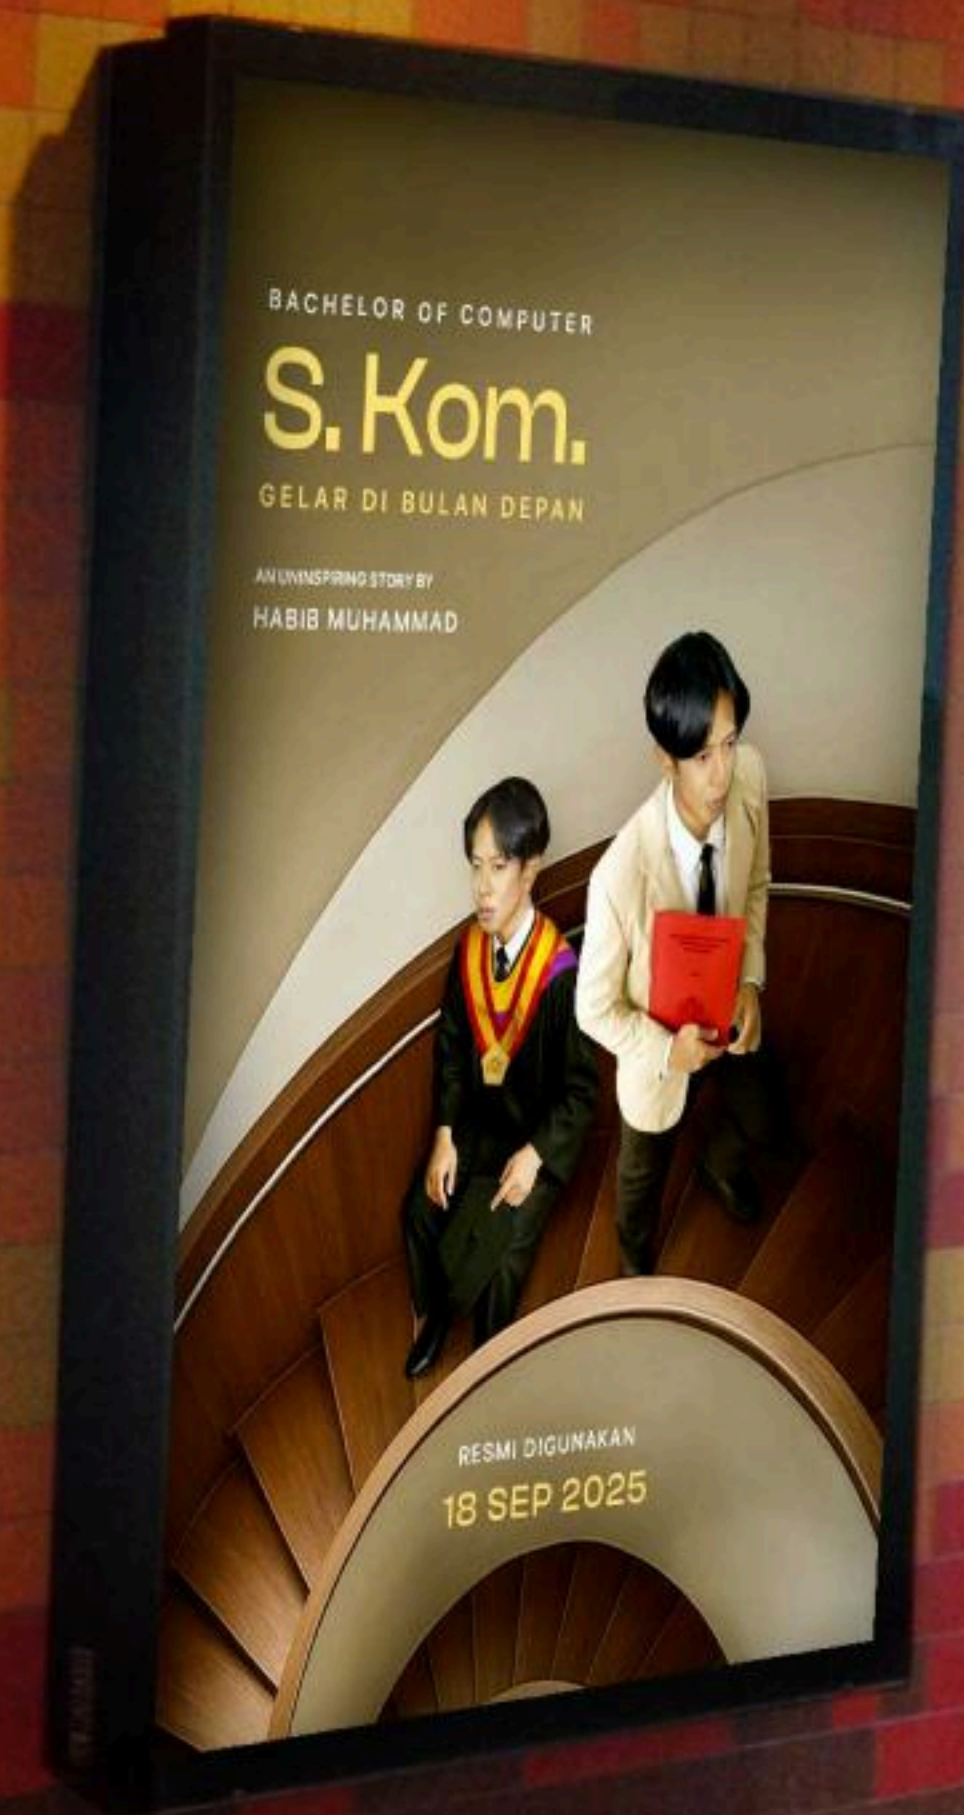

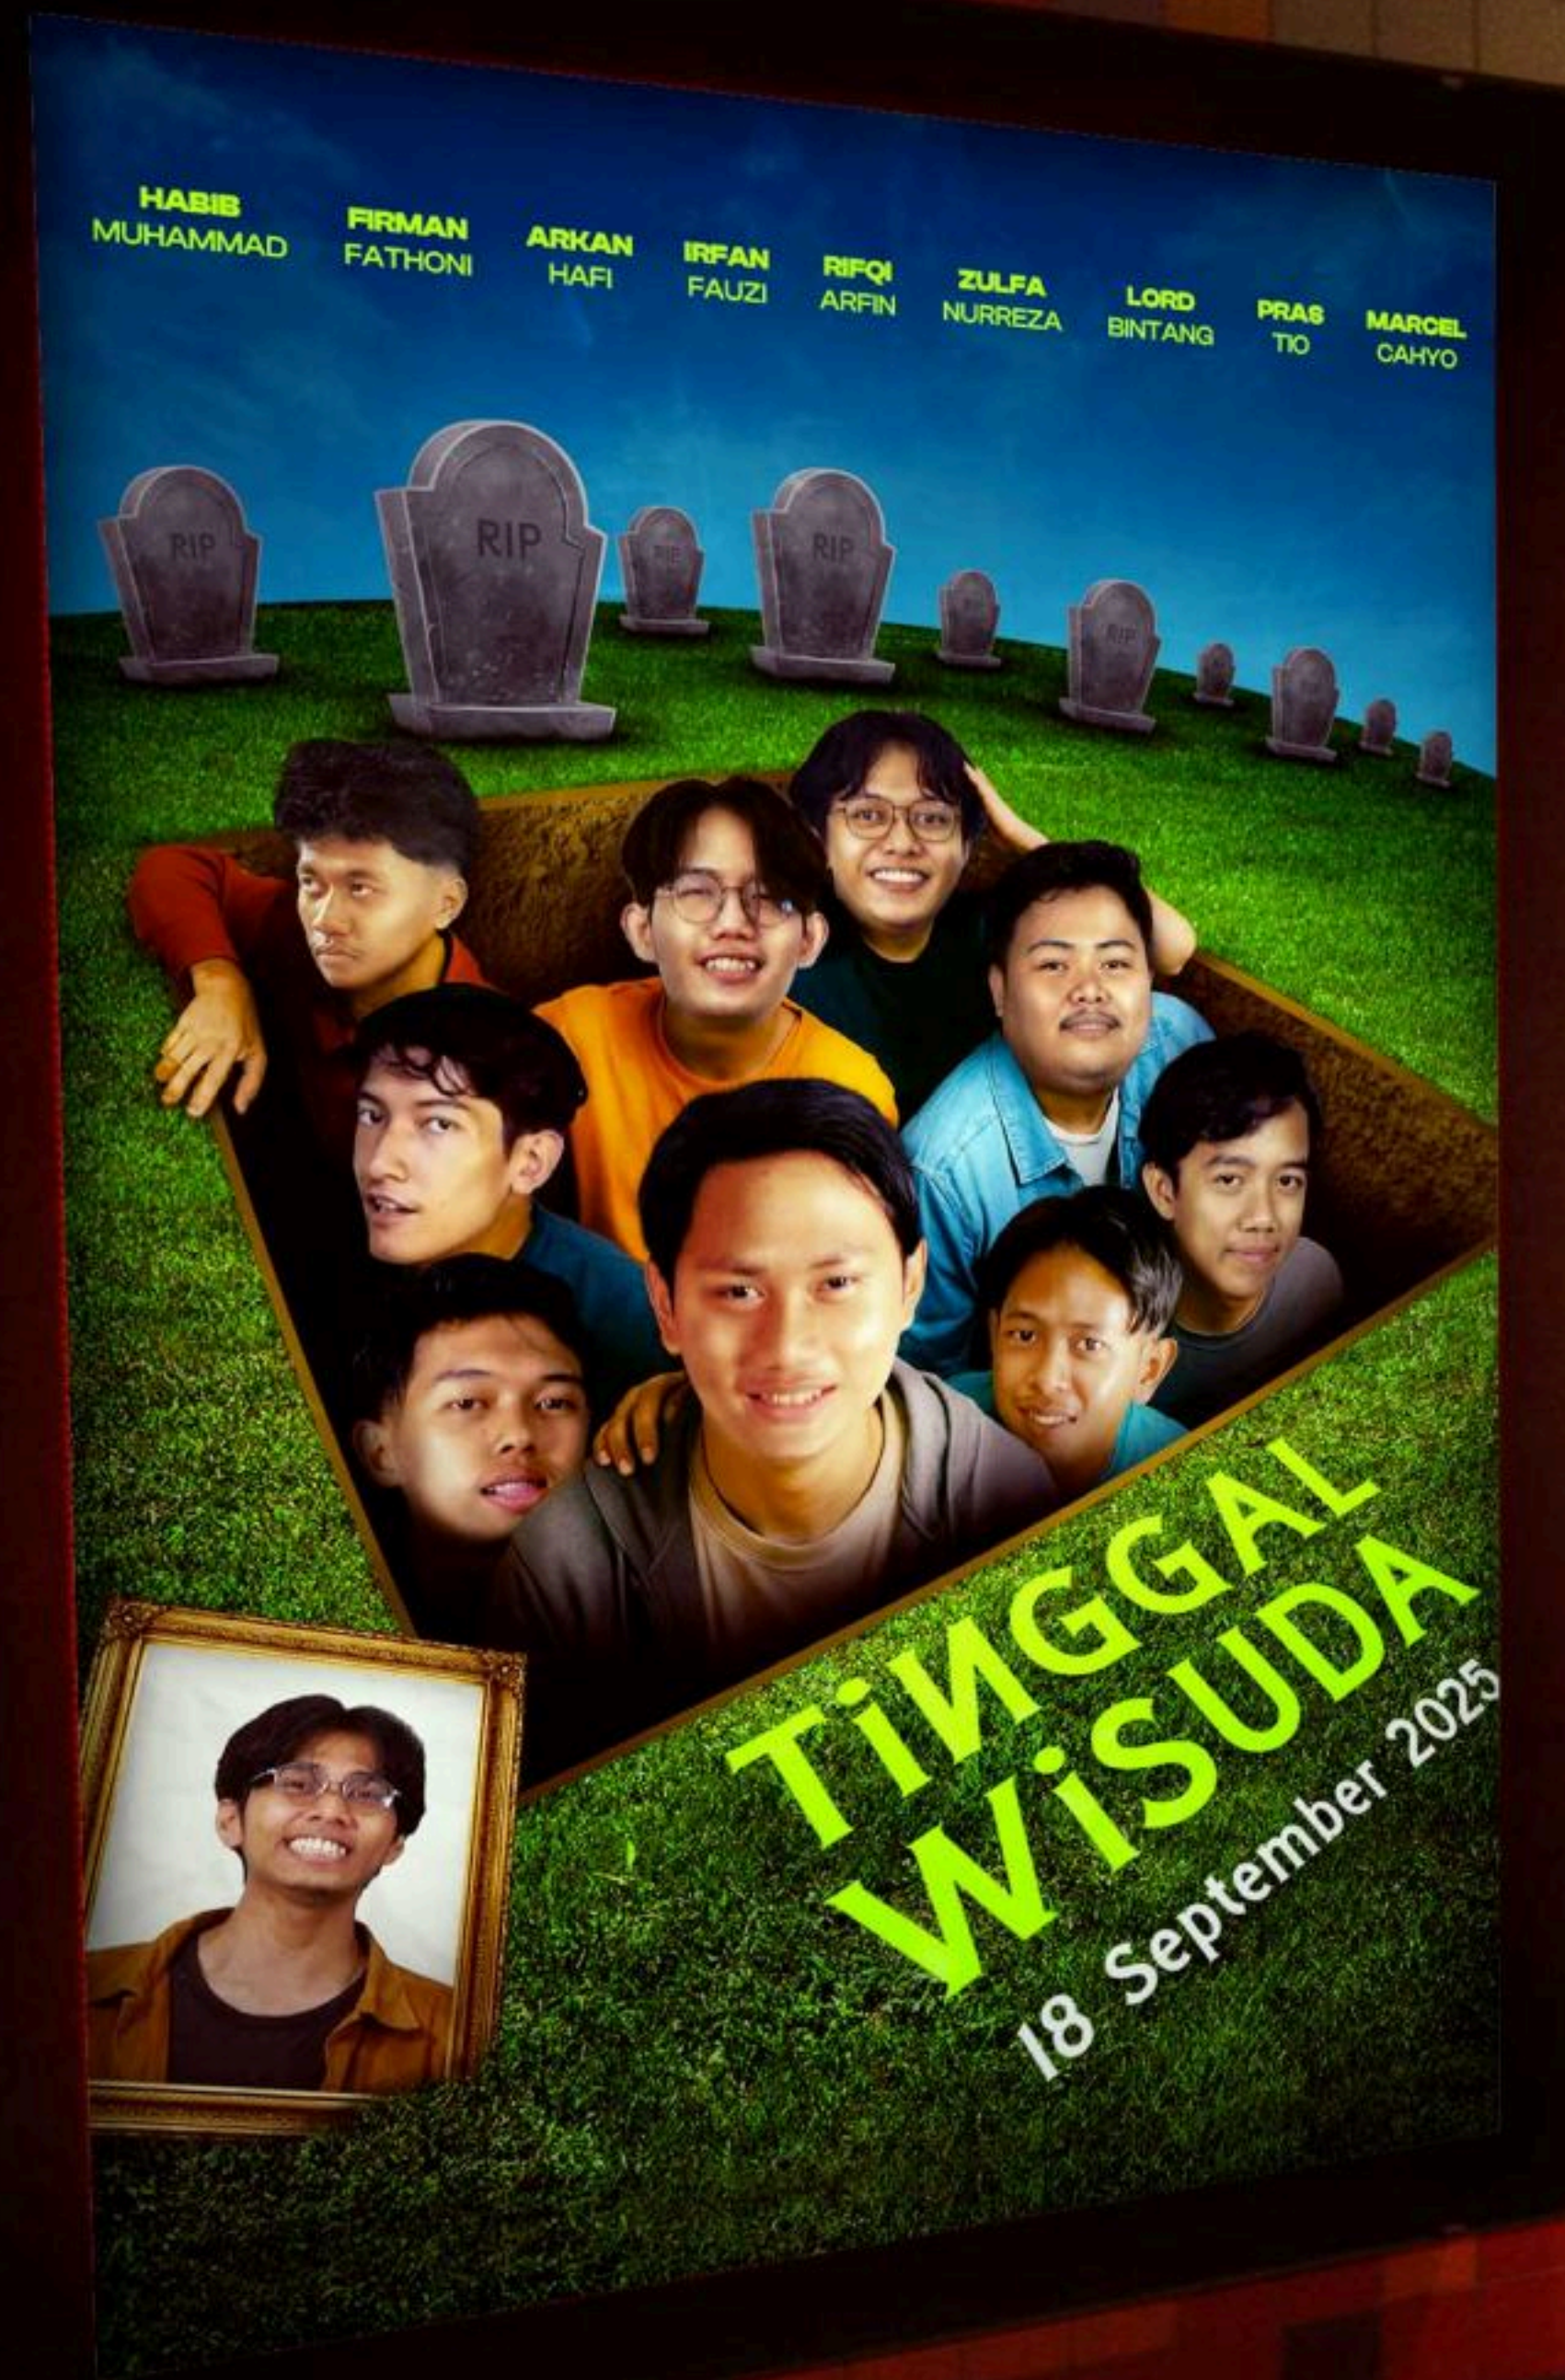

Vietnamese-style Advertising Poster

This project is a personal exploration in poster design inspired by Vietnamese advertising style, characterized by bright visuals, strong contrasts, and an optimistic atmosphere. This poster promotes GoTo services, highlighting energy, enthusiasm, and positivity—elements commonly found in Vietnamese street advertising and billboards

Movie Poster (Parody)

This project is a my personal project focused on creating a parody poster design for the film 'Tinggal Meninggal'.

The creative process involved digital imaging techniques and image manipulation, resulting in a visual composition that resembles the original film poster but with the distinctive comedic touch characteristic of parody style.

Thank You
